andrenugrahaakbar@gmail.com | (+62)82123005241 | [Linkedin](#) | West Jakarta, DKI Jakarta.

Industrial Engineering graduate from Andalas University with strong analytical skills and solid understanding of operational processes, particularly in inventory management and supply chain operations. Experienced in inventory operations, supplier performance analysis, and data-driven inventory planning. Highly interested in Supply Chain Planning, Inventory Control, and Operations Analytics, with proven ability to utilize Python, Power BI, and analytical tools to improve planning accuracy and operational efficiency.

EDUCATION

Universitas Andalas

Bachelor of Industrial Engineering, Faculty of Engineering

Padang, West Sumatra

August 2021 – July 2025

- GPA: 3.62/4.00
- Thesis : “Development of a Demand Forecasting System for Reorder Point Calculation Using Machine Learning in the Retail Sector (Case Study: XYZ Mart)”

Work & Internship Experience

Freelance Data Visualization Analyst (Project-Based)

- Developed interactive data visualization dashboards using Power BI to support operational analysis and decision-making.
- Processed and transformed raw data into clear and actionable visual insights for non-technical stakeholders.
- Collaborated closely with clients to translate business requirements into informative analytical reports and dashboards.

Information Systems & Decision Laboratory (LSIK FT-UNAND)

Laboratory Assistant & HRD Staff

Padang, West Sumatra

June 2024 – June 2025

- Conducted laboratory sessions in Engineering Drawing, Information Systems, Computer Programming, and Data Analytics for 2–3 groups per course (± 6 –15 students per period).
- Mentored students in case studies and data-driven mini projects, from requirement analysis to solution design.
- Acted as a project mentor, assisting in translating business problems into logical and technical models.
- Involved in laboratory HR functions, including recruitment, training, and development of new assistants.

PT Semen Padang

Inventory Division Intern

Padang, West Sumatra

January 2024 – February 2024

- Performed daily spare-part stock inspections and validated consistency between physical inventory and SAP system records.
- Updated material location and identification data in the warehouse system to improve inventory traceability.
- Supported inventory data accuracy improvements through location validation and material mismatch identification.

ORGANIZATION EXPERIENCE

DOTCOM HMTI FT UNAND

Human Resource Development Department Coordinator

Padang, West Sumatra

August 2023 – August 2024

- Managed and coordinated training and development programs to enhance members' technical (data & analytics) and soft skills.
- Led recruitment and onboarding processes, including workforce planning, candidate selection, and initial performance evaluation.
- Initiated interest-based development programs focusing on data science and analytical thinking.

Himpunan Mahasiswa Teknik Industri (HMTI FT UNAND)

Research & Development Department Staff

Padang, West Sumatra

March 2023 – December 2023

- Supported research activities and competency development programs for students.
- Contributed to knowledge-sharing initiatives and technical skill enhancement.
- Assisted internal collaboration to improve departmental program effectiveness.

PROJECT EXPERIENCE

Demand Forecasting & Inventory Optimization (Personal Portfolio Project)

Link : <https://inventory-ml-dashboard.streamlit.app>

Tools : Python, XGBoost, Pandas, Streamlit

- Developed a daily demand forecasting model using XGBoost with lag and rolling window features to capture temporal sales patterns.
- Integrated demand predictions into EOQ, Reorder Point, and Safety Stock calculations for data-driven inventory planning.
- Built an interactive Streamlit dashboard to visualize demand trends, inventory levels, and stockout risks for decision support.

Supplier Performance & Lead Time Analysis (Personal Portfolio Project)

Link : <https://lead-time-po-late-prediction.streamlit.app>

Tools : Python, XGBoost, SVR, Streamlit

- Developed predictive models for actual lead time and purchase order delay risk using SVR and XGBoost.
- Analyzed supplier performance by product category, region, and reliability using operational metrics such as OTIF.
- Achieved 84.7% F1-score for PO delay classification and 10.2% MAPE for lead time prediction to support supply risk mitigation.

Skills

Technical Skills

- Data Analysis & Visualization: Python, Pandas, SQL, Power BI.
- Supply Chain & Inventory: Demand Forecasting, EOQ, Reorder Point, Safety Stock
- Systems & Tools: SAP (Inventory), Microsoft Office (Word, Excel), SPSS

Soft Skills

- Analytical Thinking, Critical Thinking, Communication, Leadership, Problem Solving, Team Collaboration.
