[Portofolio](#)

Industrial Engineering graduate from Andalas University with a strong interest in supply chain and operations. Experienced in inventory management and data analysis through internship and academic projects, including demand forecasting and inventory planning. Able to use Python and Power BI to analyze data and generate insights for supporting decision-making. Interested in building a career in Supply Chain Planning, Inventory Control, and

Operations Analytics.

EDUCATION

Universitas Andalas

Bachelor of Industrial Engineering, Faculty of Engineering

• GPA: 3.62/4.00

• Thesis : “Development of a Demand Forecasting System for Reorder Point Calculation Using Machine Learning in the Retail Sector (Case Study: XYZ Mart)”

Padang, West Sumatra

August 2021 – July 2025

Work & Internship Experience

Freelance Data Visualization Analyst (Project-Based)

- Developed interactive data visualization dashboards using Power BI to support operational analysis and decision-making.
- Processed and transformed raw data into clear and actionable visual insights for non-technical stakeholders.
- Collaborated closely with clients to translate business requirements into informative analytical reports and dashboards.

Information Systems & Decision Laboratory (LSIK FT-UNAND)

Laboratory Assistant & HRD Staff

- Conducted laboratory sessions in Engineering Drawing, Information Systems, Computer Programming, and Data Analytics for 2–3 groups per course (± 6 –15 students per period).
- Mentored students in data-driven case studies, guiding them from problem identification to analytical solution development.
- Acted as a project mentor, assisting in translating business problems into logical and technical models.
- Involved in laboratory HR functions, including recruitment, training, and development of new assistants.

Padang, West Sumatra

June 2024 – June 2025

PT Semen Padang

Inventory Division Intern

- Conducted inventory validation and data reconciliation between physical stock and SAP system to improve data accuracy and support warehouse efficiency.
- Updated material location and identification data in the warehouse system to improve inventory traceability.
- Supported inventory data accuracy improvements through location validation and material mismatch identification.

Padang, West Sumatra

January 2024 – February 2024

ORGANIZATION EXPERIENCE

DOTCOM HMTI FT UNAND

Human Resource Development Department Coordinator

- Managed and coordinated training and development programs to enhance members' technical (data & analytics) and soft skills.
- Led recruitment and onboarding processes, including workforce planning, candidate selection, and initial performance evaluation.
- Initiated interest-based development programs focusing on data science and analytical thinking.

Padang, West Sumatra

August 2023 – August 2024

Himpunan Mahasiswa Teknik Industri (HMTI FT UNAND)

Research & Development Department Staff

- Supported research activities and competency development programs for students.
- Contributed to knowledge-sharing initiatives and technical skill enhancement.

Padang, West Sumatra

March 2023 – December 2023

- Assisted internal collaboration to improve departmental program effectiveness.

PROJECT EXPERIENCE

Demand Forecasting & Inventory Optimization (Personal Portfolio Project)

Link : <https://inventory-ml-dashboard.streamlit.app>

Tools : Python, XGBoost, Pandas, Streamlit

- Developed a demand forecasting model using XGBoost to improve inventory planning accuracy and support data-driven decision making in retail operations.
- Integrated forecasting results into EOQ, Reorder Point, and Safety Stock calculations to reduce stockout risk and optimize inventory levels.
- Built an interactive Streamlit dashboard to visualize demand trends, inventory levels, and stockout risks for decision support.

Supplier Performance & Lead Time Analysis (Personal Portfolio Project)

Link : <https://lead-time-po-late-prediction.streamlit.app>

Tools : Python, XGBoost, SVR, Streamlit

- Developed predictive models for actual lead time and purchase order delay risk using SVR and XGBoost.
- Analyzed supplier performance by product category, region, and reliability using operational metrics such as OTIF.
- Achieved 84.7% F1-score for PO delay classification and 10.2% MAPE for lead time prediction to support supply risk mitigation.

Skills

Technical Skills

- Data Analysis & Visualization: Python, Pandas, SQL, Power BI.
- Supply Chain & Inventory: Demand Forecasting, EOQ, Reorder Point, Safety Stock
- Systems & Tools: SAP (Inventory), Microsoft Office (Word, Excel), SPSS

Soft Skills

- Analytical Thinking, Critical Thinking, Communication, Leadership, Problem Solving, Team Collaboration.
